Cover

Lecture Notes on Functional Analysis
with Applications to Linear Partial Differential Equations
Professor A. Bressan
Compiled by J. Stratton
Providence, Rhode Island
American Mathematical Society

Table of Contents (also on the publisher's website):

Partial Differential Equations with p -Laplacian
Related Differential Equations and Inequalities
Linear Approximations of Functions with Several Restricted Derivatives
On Bernstein-Durrineyer Polynomials with Jacob Weights
On some mathematical aspects of the ring cavity problem

Well-posedness and asymptotic behaviour of non-autonomous linear evolution equations
Bounded perturbations of Ornstein-Uhlenbeck semigroups.

Has footnotes at the end of each lecture but no bibliography at the end of the book. Has index.

No conflict with Bressan, Alberto in the catalog.
