

Cybersecurity Risk Management for Public Libraries: Weapons of Mass Instruction

Presented by Chris Markman, MSLIS

Some background

- > Capstone Project / Fieldwork since 2014
- > Collaborators: Alex Caro & faculty advisor Robert Lyons

BA Political Science &
Masters in Public Administration
(expected 2015)

MSLIS 2011,
MSIT (expected 2016)

Outline

- > What we talk about when we talk about cybersecurity?
(sorry Raymond Carver, bad joke)
- > Some things we found
(without getting too specific)
- > The value proposition for libraries
(and how to fund these ideas)

Not Cybersecurity

Not this...

```

root@kali: ~
File Edit View Search Terminal Help
-
-D enumerate DHCP address space from inp
-p send a ping packet for alive check (d
-e dst,hop send an erroneous packets: destinatio
-s port,port,... TCP-SYN packet to ports for all
-a port,port,... TCP-ACK packet to ports for all
-u port,port,... UDP packet to ports for alive c
-d DNS resolve alive ipv6 addresses
-n number how often to send each packet (default
-W time time in ms to wait after sending a pa
-S slow mode, get best router for each r
-I srcip6 use the specified IPv6 address as sou
-l use link-local address instead of glo
-v verbose (twice: detailed information,
Target address on command line or in input file ca
of 2001:db8::1-fff or 2001:db8::1-2:0:ffff:0:8-fff
Returns -1 on errors, 0 if a system was found alive
root@kali: ~# alive6 -i ff02::1 eth0
Alive: fe80:: [ICMP echo-reply]
Alive: fe80:: [ICMP echo-reply]
Alive: fe80:: [ICMP echo-reply]
Alive: fe80:: [ICMP echo-reply]
Scanned 1 address and found 4 systems alive
root@kali: ~#

```

- None
- WEP (Transitional Security Network)
- ✓ WPA/WPA2 Personal
- WPA2 Personal
- WPA/WPA2 Enterprise
- WPA2 Enterprise

Warmer...

YOUR PII CHART™

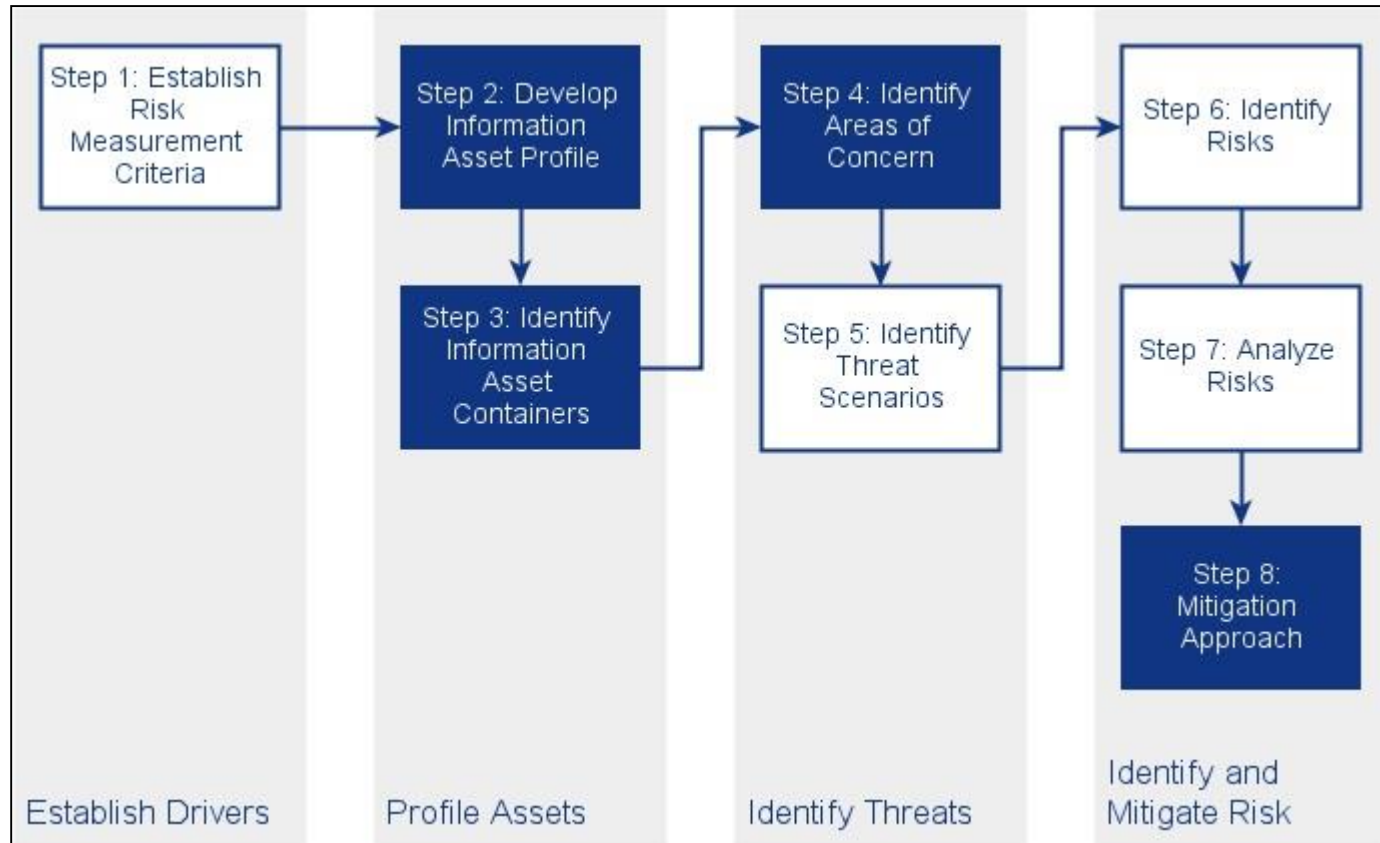

Take time to inventory the identity relationships you have with the companies, organizations, and individuals you entrust with your personally identifiable information or PII. See how your identity is a PII Chart™, a picture of relationships you've created. Once you visualize the slices of your PII, managing your identity assets becomes easier.

LEGEND

-  **SSN** SOCIAL SECURITY NUMBER
-  **CONTACT INFORMATION**
(email address, physical address, telephone and mobile numbers)
-  **GOVERNMENT-ISSUED IDENTIFICATION**
(driver's license, passport, birth certificate, library card)
-  **BIRTH DATE, BIRTH PLACE**
-  **WWW** ONLINE INFORMATION
(Facebook, social media, passwords, PINs)
-  **GEOLOCATION**
(smartphone, GPS, camera)
-  **VERIFICATION DATA**
(mother's maiden name, pets' and kids' names, high school, passwords)
-  **MEDICAL RECORDS INFORMATION**
(prescriptions, medical records, exams, images)
-  **ACCOUNT NUMBERS**
(bank, insurance, investments, credit cards)

UNIVERSITY

Wifi Pineapple by Hak5

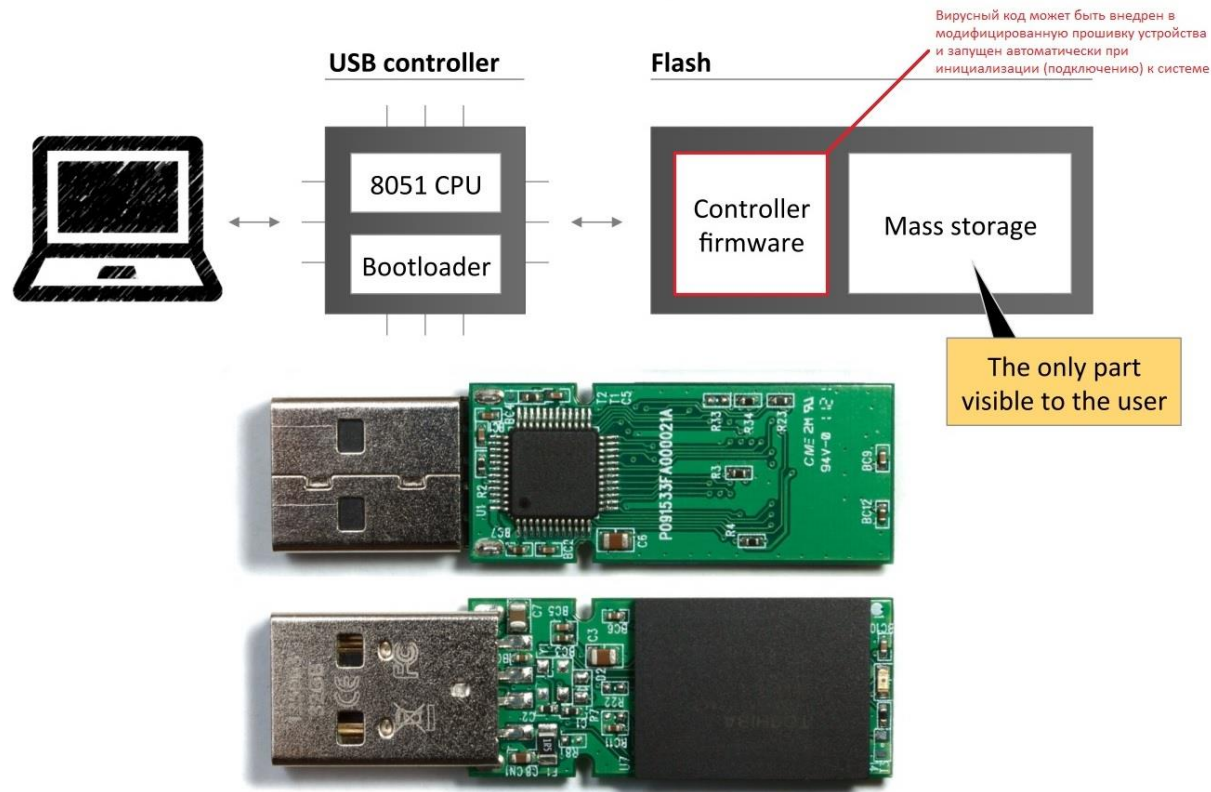

CLARK
UNIVERSITY

“Wall Wart” PCs

BadUSB Exploit

USB devices include a micro-controller, hidden from the user

Value Proposition

- > Security skills = Library Skills. Leverage MOOCs.

Futurelearn.com

- > Digital Collections

If my computer is broken, I can't stream!

- > Reputation and Funding

People really *really* don't like data breaches...

- > YA Programming

Raspberry Pi & Arduino tools. Workforce initiatives...

- > Legal Ramifications

Liability, liability, liability

Thanks!
