BUT...

Librarian wanted volumes handled like print.
(catalog each volume)

We don't do that with ejournals...

So they're sort of like eBooks

- **We had a workflow for cataloging individual ebooks**
- **Adapted this to fit in new volumes**
 - **Just needed some sort of update about when the new volumes are added**
 - **GSA titles send table of contents alerts, this is enough to fit them into our workflow**

Investigating other e-available standing orders

Adding Decision Criteria

- Access type
- Pricing
 - How is it billed?
 - Per volume
 - Per year
 - Comparison to print pricing
- If we already had print plus online order format, was the online activated in the catalog?
- Were there multiple print standing orders on campus

Implementation

Unforeseen problems

- MARC Records for content analyzed or classed separately
- Print orders through YBP often received MARC records automatically
- Did not work for electronic, unless it was one of the following platforms:
 - Gale
 - Oxford
 - Sage
 - Wiley
 - Cambridge
 - CRC
 - Elsevier

Solution

• Identified and discussed methods of receiving updates versus new volumes

• Submitted them to report to local services

Impact on Print Receiving

- Noticeable reduction at this point
- Results in more content being handled by the eResources side of CER, through the report to local services
